

# Precipitation Experiment

Before the experiment:

What materials are you using?

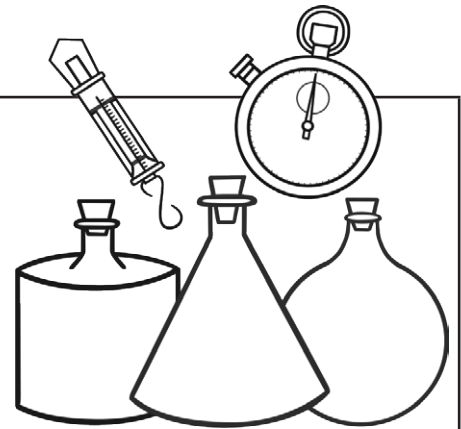

What steps will you take?

What do you think will happen? (select one)

- Ice cubes will melt and there will be no rain.
- The hot water and the cold ice will cause the rain.
- The hot water will form steam in the jar.

During the experiment:

Notes:

After the experiment:

What happened?

Why did this happen? (Explanation)
